PRODUCT DATA SHEET

PARTS WASHING SOLVENT

PRODUCT DESCRIPTION

Parts Washing Solvent is a special blend of solvents offering an effective solvent for your parts- washing machine or to simply soak parts in. For heavy build-up, agitate the product or scrub with a degreasing brush. Allow the solvent to penetrate for a few minutes, swirl off deposits, and remove from bath. The solvent will evaporate to a dry finish. It can also be sprayed onto oily and greasy surfaces and wiped off with a clean rag or lint free cloth to leave a clean finish

TYPICAL PROPERTIES

Property	Results
Appearance	Clear, colourless liquid
Specific Gravity @ 15°C	Typically 0.78
Flash Point, °C	Approximately 42
Boiling Point, °C	Typically 162 – 192
Auto-ignition Temperature, °C	286

TRANSPORT AND HANDLING

UN No.	1300
Dangerous Goods Class	3, Flammable Liquids
Hazchem Code	3Y
Packaging Group	III

Refer to the Safety Data Sheet for safety instructions prior to handling.

Available in: 200 Litres and 20 Litres

Item Code: HI8-3350

Effective: March 2020
