PRODUCT DATA SHEET

SYSTEM FLUSH

DESCRIPTION & APPLICATION

Hi-Tec System Flush is a high detergent, multi-use flushing additive for gently flushing and cleaning engines, gearboxes, hydraulic systems and reciprocating compressors.

Hi-Tec System Flush should not be used in automatic transmissions.

INSTRUCTIONS FOR USE

Run the engine for a short time to warm up the old oil.

Add **Hi-Tec System Flush** to the old oil in the engine at a dose rate of 375 ml per 5 litres of engine oil.

Again run the engine for a short time to allow the detergents in **Hi-Tec System Flush** to remove deposits from the engine and solublise waste material in the oil.

Drain the mixture from the engine and refill with fresh oil.

Note: There may be some residual **Hi-Tec System Flush** still in the engine after draining which will continue the cleaning action. Monitor the engine oil pressure and check the oil filter after a short time of running with the new oil, as there may be deposition in the oil filter of more removed waste material which may restrict oil flow.

TYPICAL PROPERTY

Property	Results
Appearance	Clear brown liquid
Density, kg/l	0.96
Viscosity @40°C, cSt	105
TBN, mg KOH/g	110
Flash Point, °C	220
Solubility in Water	Insoluble

Available In: 205 Litres, 20 Litres, 5 Litres, 1 Litre
