

PRODUCT DATA SHEET

TRUCK AND FARM GREASE

PRODUCT DESCRIPTION

Truck and Farm Grease is a red, semi-synthetic, smooth, tacky grease recommended for use in bearings, chassis parts, gears and couplings in automotive, agricultural, marine and industrial applications.

Truck and Farm Grease is used for bearing lubrication from normal to unusually severe load conditions, for high and low temperature applications, and situations where water spray or ingress is encountered.

CHARACTERISTICS

Truck and Farm Grease is manufactured with lithium complex thickener combined with high quality paraffinic and polybutene base stocks, extreme pressure (EP) additives, rust, oxidation and corrosion inhibitors, tackiness additives and effective extreme pressure additives to cater for unusually high load service conditions.

Truck and Farm Grease protects against wear on all moving parts from shock loadings to unusually high-load service. It helps prevent scuffing and further assists in wear prevention because it has excellent shear stability allowing it to withstand high load extreme pressure situations.

Truck and Farm Grease resists "squeeze-out" from lubricated surfaces under heavy load conditions. It has been specially formulated to include a shear-stable tackiness agent which, unlike other lithium complex greases, has the extra tenacity for "stay-put" lubrication, and the ability to resist water washout or water spray dilution.

Truck and Farm Grease has high shear stability which ensures long service life particularly in sealed anti-friction bearings. The excellent resistance to mechanical shear combined with high film strength maintains grease consistency for extended lubrication service.

Truck and Farm Grease is oxidation inhibited for long service life, and rust and corrosion inhibited to provide effective lubrication under difficult corrosive environments or in rust prone service situations. The inhibitors protect most metal components under these adverse conditions.

SPECIFICATIONS

Specifications: ISO 6743-9: L-XBEHB2 and DIN 51502: KP2P -20.

RECOMMENDATIONS

INDUSTRIAL and GENERAL - Recommended for ball, roller, needle and slow speed plain bearings operating under all service conditions. **Truck and Farm Grease** has an excellent service record under unusually high load and/or shock load service conditions.

AUTOMOTIVE - Recommended for chassis universal joints, and other general lubrication areas in cars, trucks, tractors, trailers etc.

Care should be taken if using **Truck and Farm Grease** in wheel bearings as it may be too heavy for this application. Preferably use **Lithplex Tac EP2** grease for wheel bearings.

Hi-Tec suggests that the equipment manufacturers' recommendations for grade, performance requirements and general operating conditions should be checked prior to use.
